Saturday evening at 8 o'clock in Chicago, at the home of the groom's parents, Mr. and Mrs. S. L. Crim, in the presence of only a few friends. The bride left a week ago for a visit with friends in Chicago, and was shortly followed by Mr. Crim who has been residing the past three years in the city with his uncle and aunt, Mr. and Mrs. J. S. McClintock. While the young couple had been sweethearts for some time, the wedding was not anticipated at an early date. They will be at home for the present with the groom's parents at 7058 Normal Boulevard, Chicago.

A quiet wedding was held yesterday at the home of Miss Steila Thompson, daughter of Mr. and Mrs. U. S. Thompson of 922 West Eighth street, and Mr. Leander McElroy of Tulsa, son of Rev. and Mrs. Hugh McElroy of that city. They were united in marriage at 10 o'clock at the home of the bride's parents, Rev. McElroy, father of the groom, officiating. Only the members of the family and a few intimate friends were present in the flower-decorated rooms, and the bridal couple left on the noon train for a wedding trip to Chicago. The bride wore a becoming tailored gown of blue with hat and accessories to match and wore a corsage bouquet of bride's roses and lilies of the valley. They will be at home after ten days at 1005 South Elwood Avenue, Tulsa, where Mr. McElroy is assistant cashier of the National Bank of Commerce.

A surprise to the many friends as well as the relatives of the young people was the wedding of Miss Pauline Whitten daughter of Mr. and Mrs. F. A. Whitten, 428½ West Park Place, and Mr. Curtis Fowler Crim, which was celebrated very quietly

and "Love" is very properly its name. Love was so blinding that there had been a failure even to secure a formal marriage by one of the parties involved. Emma Love was held to be the legal common-law wife of Albert W. Love. Consequently she was held entitled to letters of administration upon the estate of her husband in preference to his father.

A common law marriage was held valid by the supreme court of Oklahoma: "We do not propose to sit here, considering the most sacred relation of life, and constrain away the status of this woman, who appears to have acted in good faith; neither will we turn the innocent result of this common-law union into the world a nameless thing. She was begotten by a man who had voluntarily assumed the relation of husband and she shall be called his child and bear his name."

## ONE-HALF WHEAT CROP HARVESTED

State Board of Agriculture Up to June 25 Estimates Yield 46 Million Bu. and Average of 15 1/2 to Acre

The prospective average yield of wheat to the acre for the 1915 crop is 15 1/2 bushels, according to the June report of the state board of agriculture, and the total yield of winter wheat is estimated at 46,049,000 bushels.

While the excessive rains have damaged wheat in some localities, there never was a better prospect for corn, the early crop now practically being made.

According to the report about half of the wheat crop had been harvested up to June 25, when the rain closed. In the southwestern portion of the state the harvesting is about completed and wheat cutting should be finished by July 20.

Oats will yield about 36 bushels to the acre, according to the report, and the crop is in fine condition. About 32 per cent of the oats acreage has been harvested. Cotton has been set back by the wet weather. There will be about 68 per cent of a full crop of cotton, according to the statistics gathered by the board. The growing condition of alfalfa shows about 98 per cent. The crop is much better than that of last year. All fruits show a prospective full crop.

Mr. and Mrs. Frank Gow and Miss Helen Gow will be in Sapulpa this morning for a short visit.

The Ladies of the Maccabees of

Hibbing will meet Thursday afternoon at 2:30 o'clock at Fraternal hall for business of importance.

"Love" was evidently the all-prevailing essence of the above entitled case. "Love" was the cause of its inception.

IMMENSE SLIDE NEARING CANAL

Mass of Earth and Rocks Slowly Breaking Away Towards Panama Cut; Not Considered Very Serious

PANAMA, June 30.—Although the condition of the channel through the Culebra cut section of the Panama canal may be excellent and sufficiently deep and wide to pass the largest dredges in the United States navy, fears are expressed that soon practically the entire west bank of the canal from Contractors hill to the old Administration building in the village of Culebra will slide into the canal prism.

A thorough survey of the entire section has been completed and it has

been discovered that high up on the hillside many ominous fissures have opened which indicates that practically the entire section will ultimately have to be removed from the channel by the dredges. The section extends for approximately 2,500 feet parallel to the canal and for about 1,500 feet back from the canal axis.

The section is known as Old Culebra slide because here occurred the first great slides in the canal which caused many persons to fear that the waterway could never be finished. The present movement, however, has been very slow, although a short time ago it was discovered that a more rapid motion had set in. The engineers declare the entire movement is wholly a surface one which will not precipitate a large quantity of debris into the canal. Nor do they believe its removal will be other than a matter of time.

The condition of Culebra and New Culebra slides is all that could be wished, the engineers declare. At the toe of Culebra the channel has reached practically its planned width and depth now the dredges are largely occupied with removing such small quantities of debris as are loose by drilling operations. In front of New Culebra the channel has practically been cleared. All movement in both slides has ceased.
